

Identity Manager Assured Delivery

Secure Identity Solutions (SIS) is a security consultancy with extensive expertise in architecting and integrating Identity & Access Management (IAM) solutions for corporate enterprises. The successful deployment of these types of solutions demands vision, experience, perspective, and knowledge that extends to how organizations operate; we bring industry recognized expertise, unparalleled knowledge, and enterprise experience which is used to advise our customers on the identity management strategy that best fits their dynamic business needs. SIS helps organizations dissect their enterprise and clearly articulate their business requirements, enabling them to secure executive support and budgets for their enterprise identity management strategy.

Assured Delivery™ is a proprietary solution delivery system that allows SIS to deliver a security framework to meet the customer's business needs. The "Assured Delivery" system utilizes SIS' proprietary system engineering processes to give customers a solution that allows them to address specific business or functional needs. Assured Delivery™ provides the customer with an integrated solution for a fixed price. *"Don't buy a promise.. buy a guarantee" -- SIS Assured Delivery™ Solutions.*

 - Hard Tokens

CA Identity Manager R12 Password Management Deployment

Deploy CA's Identity Manager R12 solution to fulfill the organization's Password Management requirements which includes but not limited to:

- Password Synchronization
- Forgotten Password
- Password Reset

Upon project completion users will be able to reset their forgotten password by correctly answering several knowledge based authentication (KBA) questions via the Identity Manager web interface. The updated password will be propagated to Active Directory.

- Project Duration: Six (6) weeks

CA Identity Manager R12 Provisioning Deployment

Deploy CA's Identity Manager R12 Enterprise edition to provide end-to-end provisioning service for up to five (5) target endpoints. At the completion of the project, the customer will have an automated provisioning solution in place that will provision users to multiple endpoints through Role Based Provisioning. The solution will utilize the Workpoint Workflow system to automate the approval & certification process.

- Project Duration: Six (6) weeks

CA Identity Manager R12 Compliance Rapid Deployment

Deploy CA's Identity Manager R12 Enterprise edition to provide end-to-end provisioning service for up to five (5) target endpoints. SIS will also deploy the Identity Manager Enterprise Reporting Server and implement compliance reporting for the connected endpoints. At the completion of the project the customer will have an automated provisioning solution in place that will provision users to multiple endpoints through Role Based Provisioning. The reporting server will be configured to support one of the following compliance requirements:

- Sarbanes-Oxley Act (SOX)
- Gramm-Leach-Bliley Act (GLBA)
- Customer Proprietary Network Information (CPNI)
- Payment Card Industry Data Security Standard (PCI DSS)
- Federal Financial Institutions Examination Council (FFIEC)
- Health Insurance Portability and Accountability Act (HIPAA)

- Project Duration: Eight (8) weeks
